THE LIVING ROOM

The Design Studio of Gabberts

Jenny Reed, Karen Soojian, Christine Sutphen

The design team studied English Cotswold cottage architecture and décor when planning the living room. The effect feels as though you have walked into an English manor and is perfectly appropriate for the home. The size of the room allows for plenty of seating, and the team made great use of niches for benches as well as a game

table in a cozy corner. With a keen eye, the team chose a variety of fabrics in several patterns, textures, and materials in shades of amber, chocolate, and pear, creating warmth and vibrancy. The fabrics, in conjunction with the furniture pieces selected, add to the overall aged and collected look of the space.
